TERMS OF USE

Wintex Platform — Fixed Investment Products & Trading Operations

Effective date: September 7, 2026 · Last updated: September 7, 2026
Contact: support@wintex.biz

By accessing or using the Wintex website, application, or related services (the “Platform”), you agree to these Terms of Use. If you do not agree, do not create an account or use the Platform. These Terms govern registration, deposits, withdrawals, fixed investment plans, trading features, referrals, and account security.

1. Acceptance of Terms

These Terms form a binding agreement between you (“User”) and Wintex. Continued use of the Platform after updates constitutes acceptance of the revised Terms. Wintex may update this document at any time; the “Last updated” date reflects the current version.

2. Eligibility & Account Registration

- You must be of legal age in your jurisdiction and able to enter into binding contracts.
- You must provide accurate registration information and keep your credentials confidential.
- One natural person or authorized entity per account, unless Wintex expressly approves otherwise.
- Wintex may refuse, suspend, or terminate accounts that violate these Terms or applicable law.

You are responsible for all activity under your account. Notify support@wintex.biz immediately if you suspect unauthorized access.

3. Nature of the Platform — Fixed Investments

Wintex offers **fixed investment products** with predefined parameters (plan name, minimum/maximum amount, weekly rate, and duration). Returns described on the Platform relate to these fixed products and trading operations managed according to Platform rules.

- Investment amounts and profitability parameters are those published for each plan (for example, Pro and VIP plans) at the time of subscription.
- Plan rules, duration, and limits are shown before confirmation and form part of your acceptance.
- Wintex does **not** offer open-ended discretionary portfolio management outside the published fixed plans and Platform features.

Important: Wintex works with fixed investment values and defined profitability structures. Figures shown in the interface apply only within the selected plan rules.

4. Prohibition of Intraday 10× Leverage & Artificial Exposure

Users may **not** attempt to create synthetic leverage, artificial exposure, or multiplier strategies that exceed the economic substance of their actual deposited and allocated balance.

- **Intraday rule:** 10× leverage (or any similar ~10× multiplier of the deposit) is **not permitted on the same day**. Attempting to leverage, scale, or multiply a deposit to approximately ten times its value within a single calendar day is strictly forbidden.

- It is also forbidden to structure operations across accounts, sessions, or tools to achieve the same 10× intraday effect indirectly.
- Any attempt to bypass deposit, investment, or trading limits through multiple accounts, scripts, bots, or third-party tools is a material breach.
- Wintex may reverse, freeze, or cancel balances and operations derived from prohibited leverage or manipulation.

Violation of this section — including unauthorized 10× leverage on the day — is treated as fraud and may result in immediate suspension or permanent blocking of the account, without prejudice to further legal action.

5. Bots, Automation & Fraud

The use of unauthorized robots, scrapers, automated scripts, API abuse, market-manipulation tools, or any attempt to interfere with Platform integrity is prohibited.

- Fraud includes, without limitation: identity misrepresentation, payment fraud, chargeback abuse, referral abuse, multi-accounting to evade limits, and manipulation of deposits, withdrawals, or trading outcomes.
- Wintex may investigate suspicious activity, request additional verification, and cooperate with competent authorities where required.
- Confirmed or reasonably suspected fraud authorizes Wintex to suspend, restrict, or permanently block the account and to withhold funds subject to investigation and applicable law.

6. Deposits

Deposits are made in supported digital assets and networks only (for example, USDT on TRC20, USDT on ERC20 / Ethereum, and USDC on Arbitrum One), as displayed in the deposit interface.

- You must send only the correct token on the correct network to the address shown for your deposit session.
- Sending unsupported tokens, wrong networks, or incorrect amounts may result in permanent loss of funds. Wintex is not obliged to recover mis-sent assets.
- Deposit detection is performed according to Platform procedures (including on-chain monitoring and/or transaction ID verification). Crediting occurs after required confirmations and internal checks.
- You must select the destination of funds (wallet balance or fixed investment plan) as required by the deposit flow before or as part of the process.
- Minimum and maximum deposit amounts, and network availability, are defined in Platform settings and may change.

A deposit is considered completed only when the Platform records it as confirmed and allocates it according to your selected destination.

7. Withdrawals

Withdrawals are requests to send supported assets from your available balance to an external wallet that you control.

- Withdrawals are subject to available balance, minimum/maximum limits, daily limits, network compatibility, and fee calculation shown before confirmation.
- You must provide a valid wallet address compatible with the selected network. Incorrect addresses may cause irreversible loss.
- Withdrawal processing may be manual or semi-manual. Wintex aims to process requests within reasonable operational timeframes but does not guarantee a specific settlement time.
- Wintex may delay, hold, or refuse a withdrawal while verifying identity, source of funds, or compliance, or if fraud or Terms violations are suspected.
- Fees, net amounts, and network details are displayed prior to final confirmation. By confirming, you accept those parameters.

Once a withdrawal transaction is broadcast on-chain with a valid transaction ID, blockchain finality rules apply and Wintex cannot reverse the transfer.

8. Trading Features

Where the Platform provides trading or simulation features, they operate under Platform rules and risk parameters. They are not a commitment that past performance will repeat.

- Users must not exploit latency, interface bugs, or pricing anomalies. Detected exploitation may be voided and treated as a Terms violation.
- Wintex may modify, pause, or discontinue trading modules for maintenance, risk control, or legal reasons.

9. Referrals & Commissions

Referral programs, if active, pay commissions only according to published rates and only when referred users complete qualifying actions (such as activating a fixed investment plan).

- Self-referrals, fake accounts, and artificial volume schemes are prohibited and may lead to commission reversal and account sanctions.

10. Account Suspension & Blocking

Wintex may suspend or permanently block an account, with or without prior notice, if:

- These Terms, Platform rules, or applicable laws are violated;
- Fraud, bots, leverage abuse (including unauthorized intraday 10× exposure), or manipulation is detected or reasonably suspected;
- Required verification information is not provided;
- The account presents security, compliance, or operational risk to the Platform or other users.

During suspension, deposits, investments, trading, and withdrawals may be restricted. Blocking may result in loss of access to Platform features. Decisions are made at Wintex’s reasonable discretion based on available evidence.

11. Intellectual Property

All Platform content, trademarks, logos, software, and design elements are owned by Wintex or its licensors. You may not copy, reverse engineer, or exploit them without prior written consent.

12. Limitation of Liability

To the maximum extent permitted by law, Wintex is not liable for indirect, incidental, special, or consequential damages, including loss of profits, data, or business opportunities arising from use of the Platform, blockchain network failures, wallet mistakes, or third-party service interruptions.

Nothing in these Terms excludes liability that cannot be excluded under mandatory applicable law.

13. Indemnity

You agree to indemnify and hold harmless Wintex and its operators from claims arising from your breach of these Terms, misuse of the Platform, or violation of third-party rights or laws.

14. Governing Principles & Contact

These Terms are interpreted to ensure lawful operation of the Platform. For questions, complaints, or account issues, contact:

Email: support@wintex.biz

By creating an account, depositing funds, activating a plan, or using any Platform feature, you acknowledge that you have read, understood, and agreed to these Terms of Use.
